SUMMARY

AI Engineer focused on building reliable, production-oriented AI systems with Python. Hands-on experience through independent engineering projects spanning machine learning, deep learning, LLMs, generative AI, RAG, AI agents, evaluation, APIs, testing, security, reliability, and production ML lifecycle engineering. Interested in building and shipping practical AI software for real-world products.

PROFESSIONAL EXPERIENCE

- Fargo Solve | AI Automation Lab, AI Automation Engineer | Voice AI & Workflows** 01/2024 – 07/2024 | Remote
- Worked on AI automation and workflow solutions using Python, LLMs, voice AI, and automation tools.
 - Developed and integrated AI-driven workflows for business process automation and conversational applications.
 - Worked with APIs, LLM-based systems, speech technologies, and workflow automation as part of practical AI engineering projects.
 - Focused on building practical AI solutions that connect models, external services, and business workflows.
- FAST NUCES | AI Research Lab, Applied AI Engineer - Final Year Project** 06/2023 – 02/2024
- Worked on applied AI research involving large language models, model adaptation, and Urdu-language AI.
 - Explored LLM fine-tuning and parameter-efficient adaptation techniques for domain-specific language tasks.
 - Worked on dataset preparation, model experimentation, and evaluation of language-model performance.
 - Applied practical AI engineering and research workflows to develop and evaluate language-model solutions.
- TechCraft Labs - AI internship Program, AI Engineer Intern | LLMs & RAG** 01/2023 – 04/2023 | Gujranwala, Pakistan
- Worked on an internal knowledge-base chatbot using LLMs, retrieval, and document-processing techniques.
 - Prepared and processed PDF documents for retrieval, including cleaning, chunking, and source tracking.
 - Integrated AI capabilities with application interfaces and backend components for practical knowledge-retrieval workflows.
 - Contributed to documentation, testing, and demonstration of the AI application.

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI), IISAT University 11/2024 – Present | Gujranwala, Pakistan
Pursuing a Bachelor of Science in Artificial Intelligence, with a focus on machine learning, deep learning, data science, software engineering, and applied AI systems.

SKILLS

Software Engineering & AI Systems	Machine Learning & Deep Learning	Generative AI, LLMs & AI Agents	Production AI, RAG & MLOps
Python · Object-Oriented Programming · Software Architecture · Clean Code · Automated Testing · pytest · Git · GitHub · REST APIs · FastAPI · SQL · Databases	Machine Learning · Deep Learning · Model Training · Model Evaluation · Feature Engineering · scikit-learn · PyTorch · Neural Networks · NumPy · Pandas	Large Language Models (LLMs) · Generative AI · Prompt Engineering · LLM APIs · OpenAI API · Gemini API · Embeddings · Structured Outputs · AI Agents · Tool Calling · Agent Workflows · Planning · Execution · Memory	Retrieval-Augmented Generation (RAG) · Document Processing · Chunking · Semantic Search · Vector Databases · Qdrant · LangChain · Model Deployment · MLOps · Docker · Model Versioning · Model Monitoring · AI Evaluation · CI/CD · AI Security

LANGUAGES

- English — Working Proficiency
- Urdu — Bilingual Proficiency
- Punjabi — Native Proficiency

PROJECTS

- AgentForge, Production AI Agent Engineering Platform** 11/2025 – 02/2026
Engineered an AI agent platform supporting planning, tool calling, memory, and multi-step task execution. Implemented modular workflows with evaluation, reliability, security, and controlled agent execution.
- ModelOpsForge, Production ML Lifecycle & MLOps Platform** 05/2025 – 09/2025
Developed an end-to-end ML lifecycle platform for training, evaluation, versioning, deployment, and monitoring. Implemented reproducible workflows with FastAPI, Docker, experiment tracking, and model management.
- RAGForge, Production Retrieval-Augmented Generation System** 02/2026 – 04/2026
Engineered a production-oriented RAG system for document processing, semantic retrieval, and LLM-powered Q&A. Implemented embeddings, Qdrant vector search, source tracking, evaluation, and reliable retrieval workflows.
- Nexora, Production AI Inference Infrastructure Platform** 09/2026 – Present
Nexora is a production AI inference infrastructure platform for reliable model serving. It provides intelligent routing, retries, circuit breakers, rate limiting, authentication, and monitoring. Built with FastAPI for resilient and observable AI inference.
